

INTELEX

Safety Management System

Web-based Safety Software

Protect your people. Propel your performance.

The Intelex Safety Management System enables you to reduce workplace injuries, lower costs, and ensure regulatory compliance by effectively and efficiently managing your organization's safety program in a centralized, web-based management portal.

www.intelx.com/safety

Benefits

- ▶ **Evaluate your organization's safety performance in an instant**
Gain a full 360-degree view into your entire organization's safety performance through instant real-time reports and key performance indicator (KPI) dashboards. Log incidents across multiple departments or locations and enable complete safety performance transparency.
- ▶ **Mitigate risk by maintaining ongoing compliance**
Achieve and exceed compliance with OSHA regulations and conformance to standards including OSHAS 18001 and CSA Z100. Lower your OSHA incident rate and easily prepare 300 and 300A reports monthly and annually.
- ▶ **Reduce safety-related incidents and save time, money and resources**
Execute a proactive approach to your safety program and easily identify, analyze and mitigate potential safety hazards and risks to avoid unnecessary incidents and expenses at both the facility level and organization-wide.
- ▶ **Optimize safety meetings for maximum efficiency and ideal results**
Track meeting occurrences, archive old meeting documents, schedule new meetings, send automated meeting notifications, and record, schedule and assign follow-up actions to issues.
- ▶ **Streamline your safety processes and eliminate duplicate data**
Collect, track and report on all safety data from multiple departments or locations through one centralized web-based portal. The system can easily integrate with existing ERP software such as SAP and PeopleSoft.

“Using Intelex to ensure the effectiveness of our performance provides a safer environment for employees, contractors, and in our case, the public.”

Alan Conquergood

Build a Unique, Integrated System

The Intellex platform is a flexible, software system that gives you the ability to select the applications that are most important to your organization and create a safety management system that addresses your specific needs. Build a solution from our software library to manage every component critical to a top-performing safety management program.

This configurable system allows you to:

- ▶ Choose the applications most relevant to your organization and processes
- ▶ Seamlessly integrate any new Intellex software you purchase at a later date
- ▶ Navigate between applications through intuitive linkages within the system
- ▶ Build dashboards and reports that pull data from throughout the system and display critical information in one centralized place
- ▶ Create security groups to control user access within the software while still storing data in a central information portal
- ▶ Easily integrate with other 3rd party systems like SAP or PeopleSoft

“

The Intellex Safety Management System provides the biggest cure and solution as we're able to see the whole Metso Minerals world on one single page.

Safety Management Capabilities

Intelex's web-based software covers every process in your organization's safety program. Individual applications can be purchased as standalone products or seamlessly linked together to provide you with a comprehensive safety management system. You can even build your own unique system from scratch with our easy-to-use iForms® tool.

► Incidents and Risk Management

Record, track, report and respond to safety incidents while proactively identifying potential safety hazards and risks. Conduct accurate root-cause analysis to generate prevention strategies and implement preventative and corrective actions. Streamline reporting processes, corporate policies and workflow.

► Compliance and Legal Requirement Management

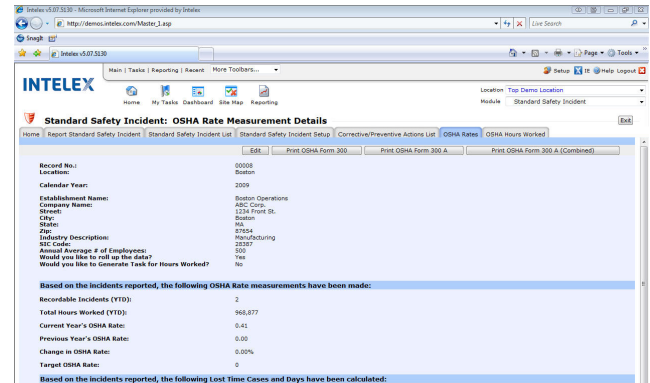

Record, track and report monitoring and measurement activities related to equipment maintenance. Easily document, assign and track action items to ensure ongoing compliance with legislation as well as assign responsibilities related to permits, corporate policies and directives.

► Audits and Inspections Management

Easily manage your audit and inspection program, including real-time dashboards on status of non-conformances and findings. Our powerful checklist builder allows the quick import and management of multiple checklists.

► Document and Training Management

Track document revisions and approvals in a central, organization-wide file database. Old document versions and associated editing revisions are automatically archived for audit preparedness while ensuring appropriate document retention for legal requirements.

Modules: Standard Safety Incidents Reporting
Work Observations
Safety Hazards and Risk Assessment
Safety Objectives
Safety Policy
Safety Meetings Management
Local Safety Meetings

Modules: Monitoring and Measurement
Legal and Other Requirements
Permits Management
Operational Control
Emergency Response

Modules: Audits Management,
Management Review
Non-Conformances &
Corrective/Preventative Actions

Modules: Document Control
Records Management
Training Management
Communications Management.
