The iForms® system is a completely configurable web-based tool that enables organizations to create unique applications to streamline any business process. iForms® leverage real-time dashboards, task management tools, and reports to save money, boost efficiency, and mitigate risk through proactive management.

How iForms® Work

The iForms® System is an intuitive, user-friendly tool that allows users with no programming experience to create unique web-based applications. iForms® solutions can be used individually or deployed across the Intelex System to interact with any existing out-of-the-box application. iForms® leverage the powerful capabilities of the Intelex Platform to enable organizations to boost performance by capturing, storing, analyzing and reporting on metrics from any business process with ease.

Benefits

▶ **Meet organizational objectives and targets**

Build complete web-based applications (collection forms, data inventories, project scorecards, real-time dashboard reports and more) to monitor, measure, and report on your progress towards corporate objectives.

▶ **Streamline all company processes and unleash the hidden power of your data**

Satisfy and exceed any unique legislative, regulatory and company-mandated EHSQ requirements through automated workflow and consistent, measurable follow-up on all EHSQ activities.

▶ **Gain complete, companywide transparency on any organizational process**

Use our centralized, web-based portal, configurable reporting tools, and real-time dashboards to roll-up data across all business units for a complete, up-to-date, bird's eye view on the status of all organizational programs.
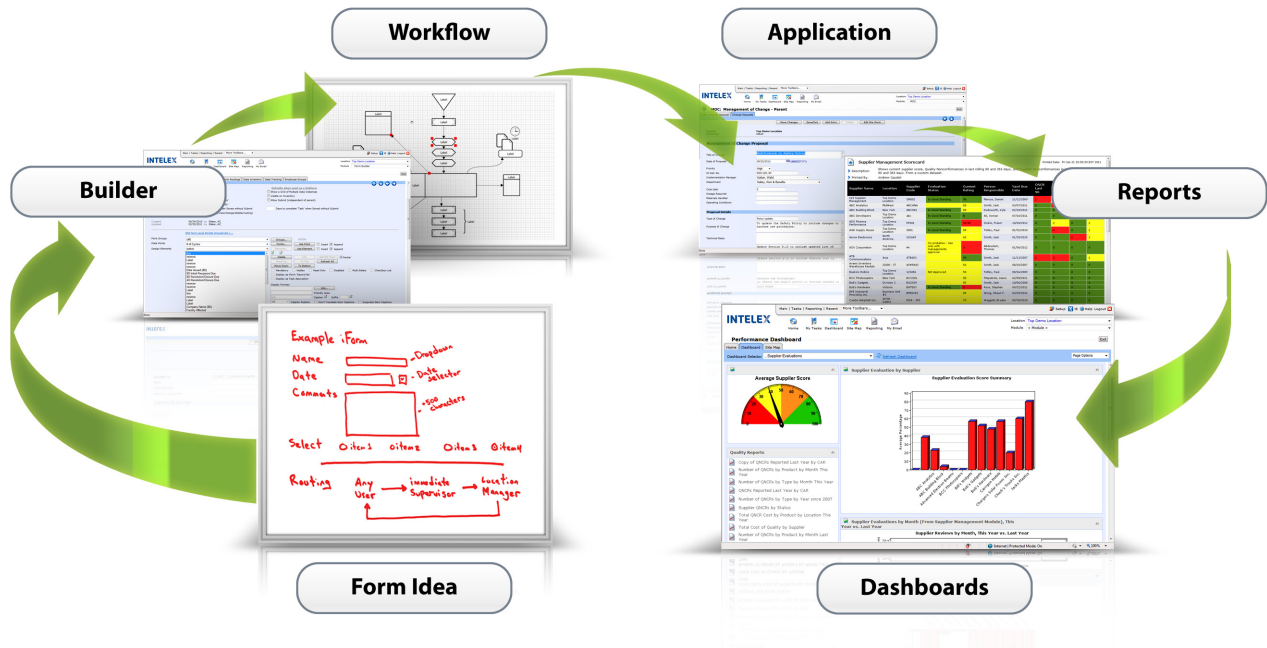

▶ **Integrate custom applications with data and prebuilt modules across the Intelex entire system**

Synergize all organizational processes by integrating custom-built iForm® tools seamlessly with all other modules in the Intelex family.

▶ **Create a culture of continuous improvement across all business processes**

Continuously improve the performance of any EHSQ and business management process and constantly raise the bar on product and service quality by tracking, measuring and analyzing the metrics captured by customized applications created with iForms®.

Built-in Platform Capabilities

▶ **Customizable data collection forms:**

Create unique data collection forms, build inventories of collected data and generate scorecards to display and interpret collected data on a summary dashboard.

▶ **Manage tasks:**

Use a built-in scheduler to schedule and assign all tasks associated with unique applications created with iForms®.

▶ **Escalating email notifications:**

Ensure nothing slips through the cracks with automatic escalating email notifications that notify employees and superiors of pending and overdue tasks.

▶ **Eliminate silos of data:**

Generate reports and dashboards using iForms® application data individually or in combination with data from other Intelex applications and suites.

▶ **System Integration:**

Seamlessly import all legacy system data into your custom iForms with the Intelex API, and integrate iForms® seamlessly with existing ERP and other management systems (e.g. SAP, Oracle).

"

What puts Intelex ahead of their competitors is their iForms® System and the ease of customizing the forms to fit the company and its processes versus changing a company's processes to fit the forms.
